SERVICES

The new townsite is serviced by a modern water and sewage system installed under the auspices of the Ministry of Treasury, Economics and Intergovernmental Affairs, and the Ministry of Environment, Water Resources. Water supply is the English River. A newly constructed sewage treatment facility became operative in December, 1972.

The majority of the area known as the old townsite is serviced with water from the Ministry of Environment's water treatment; some via a newly installed piping and others via connection of existing piping to the new system. Some private wells are also in use. Sewage disposal in the old townsite is solely by septic tank systems.

The area known as the Hydro Colony is serviced with a private water and sewage system maintained and operated by Ontario Hydro. Water is chlorinated and fluoridated. Sewage is fed into large septic tanks, chlorinated and discharged into the English River. 60 cycle electricity by Ontario Hydro. Natural Gas available through Northern & Central Gas Corporation.
